

#194 QUICK SPLICE EMERGENCY HOOK REPLACEMENT KIT

The wedge style Quick Splice is designed for in-flight replacement of the hoist hook should the cable become damaged, broken, or entangled. Allows crew members to cut the cable and secure a replacement hook in less than a minute to continue with the mission. LSC designed the wedge style Quick Splice to prevent the large reduction in cable strength that occurs when using old style lace or wrap designs. This is caused by the sharp bend in the cable when laced on the plate.

A thumbscrew pre-loads the wedge against the cable.

As the load increases, the internal forces securing the cable get tighter and tighter for a positive cable grip. Easy to follow instructions are etched on the face. Constructed of anodized aluminum with stainless steel fasteners for strength and corrosion resistance.

The Quick Splice is available separately or as an Emergency Hook Replacement Kit with attached D-LOK hook, cable cutters, and case.

Superior to wraparound and lace-through designs, the Quick Splice offers:

- Quick, and positive cable insertion - No wire wraps to come undone.
- Full rated breaking-strength of the hoist cable, with no strength degradation from lacing bends and wraps.
- Designed for 3/16", 19 x 7 hoist cable only.
- NSN 4030-01-497-6202 (#197)

#194 Quick Splice Emergency Hook Replacement Kit (as shown)

#197 Quick Splice w/ D-LOK Hoist Hook

#199 Quick Splice w/ Shackle, No Hoist Hook

#195 Cable Cutter
