RELIABLE GEAR FOR REAL AVIATORS

FLIGHT OUTFITTERS iPAD KNEEBOARD

The new Flight Outfitters iPad Kneeboards take cockpit organization to a whole new level. Loaded with innovative, pilot friendly features, these kneeboards provide a sturdy mounting bracket for an iPad Mini or Air. The bracket rotates for both portrait and landscape orientation. How about a place to take notes or hold a cell phone? The side of the kneeboard consist of a structured pocket that, when unzipped, creates a rigid platform. This platform is sized perfectly for a small 3" x 5" notepad (included) or cellphone. Lined with soft felt, this platform holds any size of iPhone. The unique design is completely reversible for use on either leg. Heavy-duty elastic leg strap securely holds the kneeboard in place. Includes drawstring bag for storage.
